

Ms. Denise Harris
Acting Missile Defense Agency (MDA) Director (Acting) for
Industrial Manufacturing Technology

Ms. Harris is the Missile Defense Agency (MDA) Director (Acting) for Industrial Manufacturing Technology. In this role, she is responsible for MDA research related to Manufacturing Technologies for current and future MDA systems. Additionally, she manages industrial base policy and assessments across all MDA programs. Ms. Harris has served as the Deputy Director for Industrial Manufacturing Technology, subsequent to her duties as the Advanced Electronics and Photonics Manufacturing Lead. She has over 23 years of experience supporting the DoD with experience related to systems engineering, optical systems, electronics and manufacturing technologies. Ms. Harris has supported the MDA since 2015.
